

## Voyageurs National Park Vegetation Map Class for Beaver Basin Break-up Mosaic

The map class "[Beaver Basin Break-up Mosaic](#)" is composed of the following vegetation associations, each described separately:

- [Leatherleaf Bog](#)
- [Black Spruce / Leatherleaf Semi-treed Bog](#)
- [Leatherleaf – Sweet Gale Shore Fen](#)
- [Northern Sedge Wet Meadow](#)
- [Northern Water Lily Aquatic Meadow](#)
- [Midwest Pondweed Submerged Aquatic Meadow](#)

The associations often occur in a spatial pattern too intricate to map individually, occurring where beaver activity has caused ericaceous mats to break up. A polygon mapped as BBX includes at least one dwarf shrub and one herbaceous association.
